

Errata

This document reflects revisions made to the 2018 *Mammoth Base Land Exchange Final Environmental Impacts Statement* (2018 Final EIS) to clarify statements based on objections that were received during the pre-decisional objection period under 36 CFR Part 218 – Project-Level Pre-decisional Administrative Review Process and the eventual objection resolution and withdrawal of the objections. New text is indicated by grey highlighting (e.g., new text), while deleted text is struck through (e.g., ~~deleted text~~).

2018 Final EIS – Page 51

~~As previously mentioned, an easement across the Federal MMSA Base Main Lodge parcel to the Mammoth Mountain Chalets will be executed subject to input from MMSA and the Association, with final approval by the Forest Service. Further agreements between MMSA and the Mammoth Mountain Chalet Association would need to be made between the two parties subsequent to the proposed land exchange and would not be required by the Forest Service. Both parties have expressed a willingness to engage in future discussions around agreements of this nature; however, the Forest Service would not be directly involved as continued support to the Mammoth Mountain Chalets and the preservation of existing agreements would be the decision of MMSA pending the transfer of the MMSA Base Main Lodge parcel into private ownership. MMSA would execute an agreement authorization satisfactory to the Mammoth Mountain Chalet Association and to MMSA to ensure continued access as well as continued utility service support for water and sewer services and continued access for other currently existing utilities to the chalet facilities. The Forest Service has no authority to enforce this agreement.~~
